

Fuel your drive to retirement with more than guarantees

If you are considering GUL, you may also consider what your dollars can buy with a protection-focused IUL. In many cases, if you pay the same GUL premium into a protection-focused IUL policy, you can receive strong guarantees plus cash value growth potential for your drive to retirement.

Same IUL premiums can deliver:

- Similar to GUL guarantees
- More cash value than GUL

BACKGROUND

Guaranteed Universal Life (GUL) offers many benefits including strong guarantees. However, it does have some limitations:

- Limited liquidity or flexibility
- Limited (if any) cash accumulation
- Designed primarily for death benefits

Value+ Protector II IUL offers a strong guaranteed death benefit like traditional GUL products while also providing flexibility and meaningful cash accumulation. Many families know they need life insurance, but also know they need more money saved for retirement. Is one better for you?

SCENARIO

- Meet Jason; 50-years old; married; two kids; needs \$500k of permanent life insurance coverage.
- Likes the security of a Guaranteed Universal Life (GUL) policy, but not the limited cash value.
- Likes the growth opportunity within an IUL, but is still concerned about guarantees

GUL AND IUL SOLUTIONS

For \$606 per month, Jason’s financial professional offers him two possible solutions.

SOLUTION 1:

\$500K Guaranteed UL – Secure Lifetime GUL 3

- Offers guaranteed insurance coverage until age 105
- Partial withdrawal capability – if Jason has built up some cash value in his policy and his needs change, he could withdraw some funds from his policy. It's important to note that this would result in a proportional reduction of accumulation value and death benefit. His advisor also explains there is often less cash value in the policy for retirement needs compared to an IUL.
- Return of Premium – if needs change, Jason could also receive some or all of his paid premiums back at year 20 or 25.¹

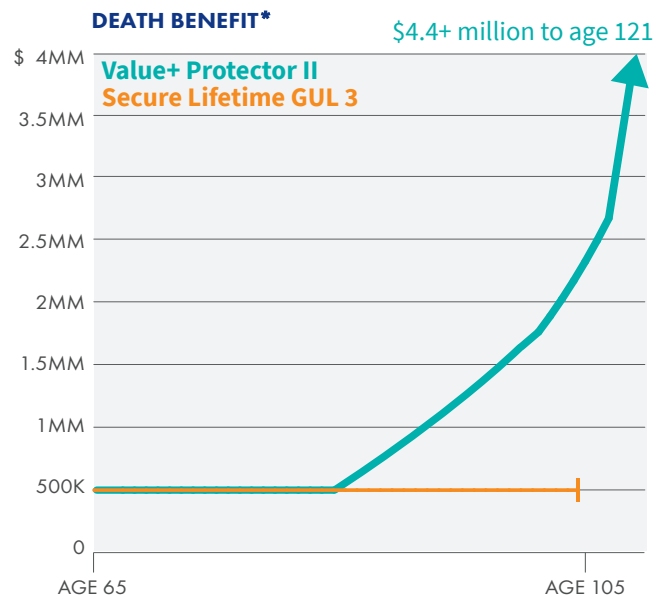

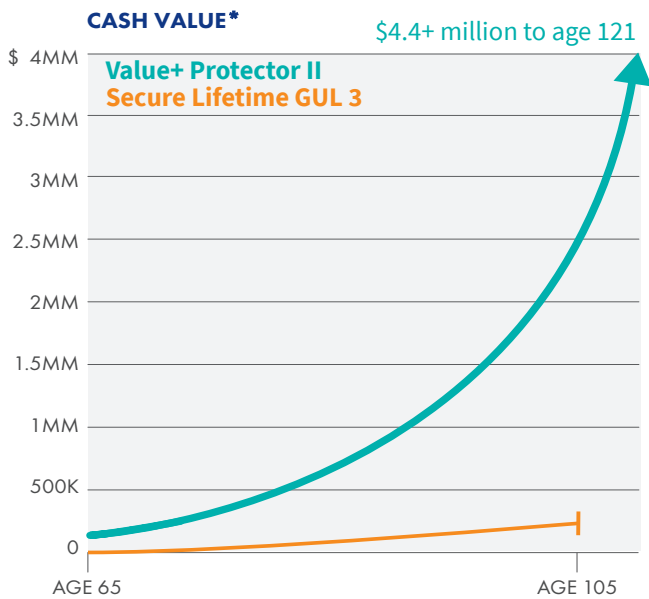

SOLUTION 2:

\$500K Index UL – Value+ Protector II

- Jason is interested in the upside potential, but he wants to see how his cash value works at a more modest 5% illustrated rate, rather than the max.
- Guaranteed death benefit coverage until age 94.
- Tax-advantaged cash accumulation with 4 index strategies to choose from. Enjoy upside market potential without downside market risk.
- Non-guaranteed death benefit coverage and cash value that can last Jason's full lifetime if funded correctly.
- Strong Index Performance liquidity feature allows for withdrawal of excess cash value, after 20 years or at age 85, with no decrease in the death benefit or guarantees, if certain conditions are met.^{2,3,4}

FUEL FOR YOUR LIFE JOURNEY - LET'S COMPARE

Issue age 50, male preferred non-tobacco, \$500k death benefit, solve for premium to guarantee GUL to age 105, full pay. Using same premium for an IUL run at 5% illustrated rate, the guaranteed death benefit coverage is available until age 94, while cash value and death benefit coverage can last Jason's entire life.⁵

* This hypothetical example is based on a 5% rate of return and your cash value will differ based on various factors.

SUMMARY

Jason wanted the most out of his insurance program. For \$606 per month his financial advisor provided him with two options. Which do you think he will choose?
