[1] The initial caps and performance-triggered rates shown are current non-guaranteed elements. They are not guaranteed beyond the initial index term and may be changed by the insurer, subject to the minimum guarantees and other limitations in the contract. Speak with your financial professional or broker dealer for applicable minimum rates. Actual interest credited may be higher or lower and may be zero for an index term.

[2] The minimum index value change rate for the Annual Point-to-Point Performance Triggered strategy is 0%.

Please note: Cap rates vary by index, strategy and term. Higher cap rates, including those associated with multi-year strategies, do not represent expected index performance, and the index may not reach the cap over the strategy term. Cap and performance-triggered rates will not be less than the minimum rates specified in the contract. Please refer to your contract or speak with your financial professional for more information.

Key terms and information

Index rate cap: Maximum percentage of index performance that can be credited as interest over an index term. Example: 10% index change > 5% cap = 5% interest earned.

Performance-triggered: Initial declared interest rate is credited if index performance is zero or greater. Example: 10% index change → 5% declared interest rate = 5% interest earned.

Premium: Money used to purchase the annuity. No additional premiums are allowed.

Diversification does not ensure a profit or protect against market loss.

Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, without the risk of loss of premium due to market downturns or fluctuations. Index annuities may not be appropriate for all individuals.

Withdrawals may be subject to federal and/or state income taxes. An additional 10% federal tax may apply if you make withdrawals or surrender your annuity before age 59½. Consult your tax advisor regarding your specific situation.

Index interest accounts are not a permanent part of the contract and may be removed due to circumstances beyond the control of The United States Life Insurance Company in the city of New York (US Life). Such circumstances include, but are not limited to, the discontinuation of an index, a change in the composition or calculation of an index, the inability to license the use of an index and the inability to hedge risks associated with these index interest accounts. Special rules govern how assets in a discontinued index interest account may be reallocated. These rules may differ by state. Please see the Owner Acknowledgment and Disclosure Statement for more information.

All contract and optional benefit guarantees, including any fixed account crediting rates or annuity rates, are backed by the claims-paying ability of the issuing insurance company. They are not obligations of or backed by the distributor, insurance agency or any affiliates of those entities and none makes any representations or guarantees regarding the claims-paying ability of the issuing insurance company.
