

Accumulation solutions from AIG to help build a brighter future

INDEX ANNUITY

A case study on asset protection with the potential for asset growth

→ Meet Henry and Catherine

- Henry (age 60) is married to Catherine (age 62).
- Concerned about inflation, they want to protect their retirement savings from market downturns.
- They also want growth potential to help them combat inflation.

→ Henry and Catherine's protected accumulation solution

- The couple uses \$100,000 to purchase a **Power Series Index Annuity** with diverse index interest accounts that may provide interest based on the returns of:¹

Equity market indices Multi-asset, risk-managed indices

- S&P 500® Index
 - Russell 2000®
 - MSCI EAFE
 - PIMCO Global Optima Index®
 - ML Strategic Balanced Index®
 - AQR DynamiQ Allocation Index®
- The index annuity protects their principal from market downturns. While no interest is paid during these times, no losses are incurred either.²
 - Plus, there are no annual fees when issued without a living benefit rider.

Index annuities are issued by American General Life Insurance Company, an AIG member company. Not available in the state of New York.

¹Interest is subject to contract provisions, such as an index rate cap.

²Guarantees are backed by the claims-paying ability of American General Life Insurance Company.

Diversified choices for more growth potential

A Power Series Index Annuity offers Henry and Catherine a diversified selection of indices and index interest accounts that may provide interest based on an index's return over a term (1 year), subject to either an index rate cap, a participation rate, or a combined participation rate with a spread. Please see Key Terms and Definitions below for more information. This table shows the gross annual index returns from high to low for 2012 to 2021.

Key terms and definitions

Index rate cap: The maximum amount of interest that can be earned over an index term.

Participation rate (PAR): The percentage of index performance that is used to calculate interest in the account.

Combined PAR rate with spread: After the PAR rate is calculated, the spread is the minimum threshold the resulting PAR return must exceed to earn interest.

Note: Index annuities are not a direct investment in the stock market. Past performance does not guarantee future results. No interest is earned in flat or down markets. The MSCI EAFE, Russell 2000® and S&P 500® are price return indices and do not include dividends. Both the ADAI and MLSB indices have embedded costs. See back cover for details. The ADAI, MLSB and PGOI indices did not exist for the full 10-year period shown. Returns prior to each index's inception date (MLSB 8/12/14, PGOI 10/9/17 and ADAI 5/18/20) represent hypothetical data determined by retroactive application of a back-tested model, itself designed with the benefit of hindsight.

Combine the power of index-based performance with the power of zero

This table shows the hypothetical interest that would have been paid from the index interest accounts if they had been available for the years shown. It assumes rates as of 4/4/22.

The Power of Zero

When index returns are negative, no interest is paid but no losses are incurred either.

Note: The interest rates shown in this table are determined by applying the current index rate caps, participation (PAR) rates and spreads shown above to the applicable back-tested index performance. Please refer to page 2 for more information on back-tested performance. Index rate caps, PAR rates and spreads are subject to change on an annual basis. This hypothetical example assumes that rates are constant for the full 10-year period and that no guaranteed living benefit rider is elected for an annual fee. This example does not represent an actual contract or result. Results will vary. Past performance does not guarantee future results.

The power of a diversified index allocation

Below are hypothetical scenarios showing the growth potential of Henry and Catherine's \$100,000 allocated to different index interest accounts, assuming the same annual index returns, index rate caps, PAR rates and spreads from the previous pages. These values were created with the benefit of hindsight.

Please note that other index interest account options are available. The information above is intended for informational purposes only and does not represent a recommendation for a specific product or index interest account. Please ask your financial professional to see current Rate Flyers for more details. Rates are subject to change. Please refer to page 2 for more information on back-tested performance. This chart is for illustrative purposes only and is produced with the benefit of hindsight. It is not intended to be indicative of the performance of any specific investment. Indices are unmanaged and are not available for direct investment. Past performance is not a guarantee of future results. The index rate caps and participation rates are hypothetical and may be reset at higher or lower rates on each contract anniversary by the issuing insurance company. It assumes no deduction of taxes or any annual fee from the annuity's contract value. If an annual fee were imposed the values shown here would be lower: Diversification neither guarantees a profit nor protects against loss.

on how a Power Series Index Annuity can help:

- **Protect** principal and growth from market downturns
- **Grow** potentially more assets for retirement
- **Guarantee** income for life

Understanding a Fixed Index Annuity

A fixed index annuity (FIA) is a contract issued by an insurance company. It is not a direct investment in the stock market or any particular index. An FIA works in two stages:

- **Accumulation:** In exchange for your money (premium), the annuity provides you with the opportunity to earn interest based in part on the performance of a particular index and/or based on a fixed rate.
- **Income:** When you need income, the issuing company promises to make regular income payments that can last for life or for a time period you choose using a process known as annuitization (for no additional cost).

In addition, some FIAs like the Power Series of Index Annuities have features (known as guaranteed living benefit riders) that can provide guaranteed income for life and access to your money during the payout stage (unlike annuitization, which permanently converts your contract into an income stream). These guarantees are backed by the claims-paying ability of the issuing insurance company and are subject to annual fees. Only one rider may be issued per contract and cannot be changed thereafter. Other restrictions and limitations apply.

Applicable laws and regulations are complex and subject to change. Please consult with your financial professional regarding your situation. For legal, accounting or tax advice consult the appropriate professional.

Withdrawals may be subject to withdrawal charges and federal and/or state income taxes. An additional 10% federal tax may apply if you make withdrawals or surrender your annuity before age 59½. Please consult your tax advisor regarding your specific situation.

PIMCO shall have no responsibility or liability whatsoever with respect to the Product. The Index is comprised of a number of constituents, some of which are owned by entities other than PIMCO. The Index relies on a variety of publicly available data and information and licensable equity and fixed income sub-indices. All disclaimers relative to PIMCO also apply separately to those constituent owners and to the index calculation agent.

The ML Strategic Balanced Index® embeds an annual index cost in the calculations of the change in index value over the index term. This “embedded index cost” will reduce any change in index value over the index term that would otherwise have been used in the calculation of index interest, and it funds certain operational and licensing costs for the index. It is not a fee paid by you or received by American General Life Insurance Company (“AGL”). AGL’s licensing relationship with Merrill Lynch, Pierce, Fenner & Smith Incorporated for use of the ML Strategic Balanced Index® and for use of certain service marks includes AGL’s purchase of financial instruments for purposes of meeting its interest crediting obligations. Some portion of those instruments will, or may be, purchased from Merrill Lynch, Pierce, Fenner & Smith Incorporated or its affiliates.

AQR and the AQR DynamiQ Allocation Index® are trademarks or service marks of AQR Capital Management, LLC or one of its affiliates (“AQR”) and have been licensed for use by American General Life Insurance Company (the “Company”) for use as a benchmark for an annuity (inclusive of all applicable riders, the “Product”). The Product is not sponsored, endorsed, sold or promoted by AQR or its affiliates, and they make no representation, and do not provide any investment advice, regarding the advisability of investing in the Product or obtaining exposure to the Index. The Index is constructed without regard to the investment needs or suitability of the Company, the Product, or any Product owners. AQR and the Index’s calculation agent have no obligation or liability whatsoever with respect to, and make no representations regarding, the Product. AQR makes no representation regarding the ability of the Index to achieve its goals and disclaims all express or implied warranties, including any warranty of merchantability and fitness for a particular purpose or use, in connection with the Index, including, without limitation, any results to be obtained by tracking the Index. Neither AQR nor the Index’s Calculation Agent guarantees the accuracy or completeness of the Index. NONE OF AQR OR ITS AFFILIATES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSION OR INTERRUPTIONS OF OR IN CONNECTION WITH THE INDEX OR ANY DATA INCLUDED THEREIN OR FOR THE PRODUCT.

AQR embeds an annual index cost in the calculations of the change in index value over the index term. This “embedded index cost” will reduce any change in index value over the index term that would otherwise have been used in the calculation of index interest, and it funds certain operational and licensing costs for the index. It is not a fee paid by you or received by American General Life Insurance Company.
