Minimum or maximum rates apply after the end of the first index term.

Key terms and information

Index rate cap: Maximum percentage of index performance that can be credited as interest over an index term. For example: 10% index change > 5% cap = 5% interest earned.

Participation rate: Percentage of index performance that is used to calculate interest. For example: 10% index change x 50% PAR rate = 5% interest earned.

Premium: Money used to purchase the annuity. In Oregon, a Power Series Index Annuity can only be issued with a single premium. No additional premiums are allowed.

Performance-triggered: Initial declared interest rate is credited to the account if index performance is equal to or greater than the minimum index value change. For example: 10% index change → 5% declared interest rate = 5% interest earned.

Note: The participation rate is set at 100% unless otherwise noted in the above table.

Annuities are issued by American General Life Insurance Company (AGL).

In no event shall any Licensor have any liability of whatever nature for any losses, damages, costs, claims and expenses (including any special, punitive, direct, indirect or consequential damages (including lost profits)) arising out of matters relating to the use of the Index, even if notified of the possibility of such damages. Each Licensor has provided AGL with all material information related to the Index methodology and the maintenance and calculation of the Index. No Licensor makes any representation with respect to the completeness of information related to the Index provided by AGL in connection with the offer or sale of any Annuity. No Licensor published or approved this document, nor does any Licensor accept any responsibility for its contents or use.

Important information on The Power Series of Index Annuities

Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, without the risk of loss of premium due to market downturns or fluctuations. Index annuities may not be appropriate for all individuals.

Withdrawals may be subject to federal and/or state income taxes. An additional 10% federal tax may apply if you make withdrawals or surrender your annuity before age 59½. Consult your tax advisor regarding your specific situation.

Index interest accounts are not a permanent part of the contract and may be removed due to circumstances beyond the control of American General Life Insurance Company. Such circumstances include, but are not limited to, the discontinuation of an index, a change in the composition or calculation of an index, the inability to license the use of an index and the inability to hedge risks associated with these index interest accounts. Special rules govern how assets in a discontinued index interest account may be reallocated. These rules may differ by state. Please see the Owner Acknowledgment and Disclosure Statement for more information.

All contract and optional benefit guarantees, including any fixed account crediting rates or annuity rates, are backed by the claims-paying ability of the issuing insurance company. They are not backed by the broker/dealer from which this annuity is purchased.
