

Dollar Cost Averaging Rider

Protection against
market fluctuations

The Dollar Cost Averaging Rider (DCA) provides an additional layer of control to help ride out the periodic ups and downs in market performance – like bumpers or shocks for your policy’s accumulation potential.

HIGHLIGHTS:

- Flexible rider can be utilized, and allocations customized, at any time.
- Will impact the amount of interest a policy earns.
- Available at no additional cost.
- DCA is available for lump sum payments (both 1035s and non-1035s) and periodic premium payments on the frequency of annual, semi-annual and single premiums
- Available on all Max Accumulator+ II (NY only), Max Accumulator+ III/ Value+ Protector III

This optional and customizable feature provides particular benefits to those using both lump sum payments (1035 or non-1035) and periodic payments (on annual, semi-annual and single premium frequencies) to help fund their IUL policy. Its design helps ensure that a large portion of your policy’s accumulation value will likely not be subject to extreme drops or rises of the market on a single date.

This is possible because the The Dollar Cost Averaging Rider is a plan for paying into an IUL in equal amounts at regular intervals. Specifically, allocating lump sum or periodic payments to index interest accounts over a number of months, instead of all at once. Lump sum premium payments allocated to the “DCA Account” will be transferred into the Index Interest Accounts in level installments over future Allocation Days, i.e. monthly.

This “DCA Account” also offers a minimum 2.00% interest crediting rate to help provide additional peace of mind.

DETAILS:

- There is no additional fee to use.
- Available for both lump sum payments (1035 or non-1035) and periodic payments (on annual, semi-annual and single premium frequencies).
- Utilizing this rider will have an effect on the amount of interest a policy earns.
- Functionality of this rider is dependent upon index performance, so there is no guarantee of more or less interest crediting from its use.
- Interest is credited daily to the DCA account.
- The amount of interest credited is determined by the Company, but shall be no less than 2%.
- Premium payments allocated to the DCA account will be transferred into the Index Interest Accounts according to the client's preselected allocation percentage.
- Transfers from a DCA account to a declared interest account are not permitted.
- At any time the policyholder may request:
 - The remaining DCA balance be allocated to the index interest accounts on the next Allocation Day.
 - A change in the Allocation percentages for the DCA account.
 - A change to the dollar amount of the DCA installment amounts.
