

Guarantee growth of your retirement income for 25 years or more

Retirement solutions from
Corebridge Financial

Looking for protected growth in today's uncertain market? Consider a Power Series Index Annuity with the Lifetime Income Choice® guaranteed living benefit (GLB) rider. Available to pre-retirees as young as age 50, Lifetime Income Choice locks in the greater of market gains or 9% annual income credits every year until age 95 or lifetime income begins, whichever comes first. That means, if you're a 50-year-old with plans to retire at age 75, you can guarantee a minimum 9% increase in your retirement income every year for 25 years, even in flat or down markets!

Guarantee your income will rise by at least 9% every year for 25 years—and protect it for life!

Hypothetical example assumptions: \$100,000 premium, 50 issue age, single life, 0% index performance, and no withdrawals until age 75. The 1.1% fee is deducted from the contract value, not the Income Base.

Note: This chart is for illustrative purposes only and is intended only to show how the Lifetime Income Choice feature works. Lifetime Income Choice is available at contract issue in select Power Series Index Annuities for an annual fee of 1.1% of the Income Base (deducted from the contract value). The Income Base is initially equal to eligible premiums (assets allocated to the contract in the first 30 days). It is not the contract value and cannot be liquidated in cash through partial payments or in a lump sum. On each contract anniversary, the Income Base may increase with any available income credits (currently 9% of the Income Credit Base) or to a highest anniversary value, whichever is greater. The Income Credit Base is the amount used solely to calculate the income credit. The highest anniversary value is the maximum value of the annuity on a contract anniversary (i.e., the date the annuity is purchased). The contract value does not increase in years with flat or down markets and may decrease due to withdrawals and/or annual fee. The above hypothetical example does not reflect the impact of fees, which would reduce the contract value. Lifetime Income Choice offers a choice of two lifetime income options: Max Income and Level Income. The Max Income Option provides more income early in retirement with a reduced percentage for life once the contract value is depleted. The Level Income Option provides a steady stream of income for life. This chart shows a lifetime withdrawal rate of 8.50% for the Level Income Option at age 75+, single life. Please see the Owner Acknowledgment and Disclosure Statement for more information.

Feel the power[®] of 9% protected income growth

With continued market volatility stemming from economic concerns such as inflation and rising interest rates, a Power Series Index Annuity with Lifetime Income Choice offers you the opportunity to:

- **Guarantee 9% income credits every year for up to 45 years.¹**
- **Protect your retirement income against market loss.**
- **Secure withdrawals of up to 11.00% per year for the Max Income Option or up to 8.50% per year for life for the Level Income Option.²**

Take action today. Contact your financial professional or agent to learn more.

¹ Until age 95 or lifetime income begins.

² The maximum amount that can be withdrawn under Max Income ranges from 5.50% - 11.00% of the Income Base, depending on the number of individuals covered, their age at the time of the first lifetime withdrawal, and whether or not contract value remains. The maximum amount that can be withdrawn under Level Income ranges from 5.00% - 8.50% of the Income Base, depending on the number of individuals covered and their age at the time of the first lifetime withdrawal.

Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, without the risk of loss of premium due to market downturns or fluctuations. Index annuities may not be appropriate for all individuals. Withdrawals may be subject to federal and/or state income taxes. A 10% federal early withdrawal tax penalty may apply if taken before age 59½ in addition to ordinary income tax. Partial withdrawals may reduce benefits and contract value.
