

Looking for growth but concerned about market volatility?

Retirement solutions from
Corebridge Financial

Guarantee growth in flat or weak markets with the new S&P 500® Performance-Triggered Account in The Power Series of Index Annuities®. This new account can help protect your assets in down markets while offering a guaranteed rate of interest that's "triggered" when S&P 500® returns are 0% or higher. As shown in the hypothetical example below, if the performance-triggered rate were 7.5%, the account would grow by 7.5% every year, as long as index performance is flat or positive.*

Protect principal in down markets while guaranteeing interest in all other markets

Hypothetical example assumption: Performance-triggered rate is set at 7.5% every year for the 10-year period

* Rate varies by annuity, premium amount and whether or not a guaranteed living benefit (GLB) rider is elected. Rate is set at contract issue and is guaranteed for an index term (1 year), after which rate may change on contract anniversaries. See rate flyer for each annuity for current rates.

Note: This chart is for illustrative purposes only. It assumes the performance-triggered rate is 7.5% on each contract anniversary. In positive markets, the 7.5% rate is credited even if index returns are higher. Interest earned in previous years are factored into calculating future interest; for example, if \$7,500 were earned in Year 1 for a \$100,000 contract, interest earned in Year 2 would equal 7.5% multiplied by \$107,500 or \$8,063. Index returns shown above are hypothetical and do not reflect actual performance of the S&P 500® Index. It is intended only to show how the S&P 500® Performance-Triggered Account works. It is not a recommendation of the S&P 500® Performance-Triggered Account. There is no fee for this account. Other accounts are available. Please consult with your financial professional or agent to see which account options are most appropriate for your individual situation.

Feel the power[®] of protected growth

With the S&P 500[®] Performance-Triggered Account in The Power Series of Index Annuities, you'll have the comfort and security of knowing how much you could earn each year. You'll receive:

- **Guaranteed “trigger” rate** if annual index returns are 0% or higher.
- **No loss of principal** if annual index returns are negative.

Take action today. Contact your financial professional or agent to learn more.

Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, without the risk of loss of premium due to market downturns or fluctuations. Index annuities may not be appropriate for all individuals. Withdrawals may be subject to federal and/or state income taxes. A 10% federal early withdrawal tax penalty may apply if taken before age 59½ in addition to ordinary income tax. Partial withdrawals may reduce benefits and contract value.
