Key terms and information

Fee is calculated as a percentage of the premium in the first year and as a percentage of the contract's prior anniversary value in years 2-5. The fee terminates on the 5th contract anniversary. In most market scenarios where an Overlay Credit is earned, the amount of the credit will be more than the amount of the fees that have been deducted over the 5-year period. In certain up market scenarios, the credit may not be sufficient to cover all fees due to the maximum overlay amount.

Index rate cap: Maximum percentage of index performance that can be credited as interest over an index term. For example: **10%** index change > **5%** cap = **5%** interest earned.

Maximum rate: percentage of the net premium that is used to help determine the maximum value of the Additional Interest Credit Overlay.

Multiplier rate: percentage applied to the contract value to help calculate the overlay benefit.

Net premium: total premiums reduced by any withdrawals in the same proportion that the withdrawals reduced the contract value.

Overlay Credit: the amount added to the contract value on the 5th contract anniversary.

Participation rate: Percentage of index performance that is used to calculate interest. For example: **10%** index change x **50%** PAR rate = **5%** interest earned.

Premium: Money used to purchase the annuity.

Annuities are issued by **American General Life Insurance Company (AGL)**, Houston, TX.

Important information on Power Select AICO Index Annuity

Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, without the risk of loss of premium due to market downturns or fluctuations. Index annuities may not be appropriate for all individuals.

Withdrawals may be subject to federal and/or state income taxes. An additional 10% federal tax may apply if you make withdrawals or surrender your annuity before age 59½. Consult your tax advisor regarding your specific situation.

Index interest accounts are not a permanent part of the contract and may be removed due to circumstances beyond the control of American General Life Insurance Company. Such circumstances include, but are not limited to, the discontinuation of an index, a change in the composition or calculation of an index, the inability to license the use of an index and the inability to hedge risks associated with these index interest accounts. Special rules govern how assets in a discontinued index interest account may be reallocated. These rules may differ by state. Please see the Owner Acknowledgment and Disclosure Statement for more information.

All contract and optional benefit guarantees, including any fixed account crediting rates or annuity rates, are backed by the claims-paying ability of the issuing insurance company. They are not obligations of or backed by the distributor, insurance agency or any affiliates of those entities and none makes any representations or guarantees regarding the claims-paying ability of the issuing insurance company.

This embedded index cost will reduce any change in index value, and it funds certain operational and licensing costs. Since it will affect the returns of the index, it may also impact the amount of interest credited to the index annuity; however, it is not a fee paid by the policy owner or received by the issuing insurance company.
